HEAT PUMPS

GE Appliances' line of heat pumps is built with **quality** components for maximum **durability** and the best in inverter technology. Efficient **performance** makes your home comfortable — so no matter which model you choose, you'll have dependable cooling, all season long.

UNYIELDING DURABILITY

Ten-Year Warranty
Double the standard 5-year parts and compressor warranty just by registering your equipment. It's a simple way to bring peace of mind that your GE unit will keep you comfortable, season after season.

Made To Last
Our units are designed with high-quality materials and tested in extreme conditions to ensure they'll perform in your environment. Plus, a high-quality cabinet and thicker top grille help prevent damage from everything from hail to poorly-thrown baseballs.

Anti-Corrosion Design
Durable, tube and fin aluminum alloy coils help ward off corrosion and can help extend the life of your unit.

DESIGNED TO PERFORM

Quiet Operation
The world is noisy. Your home shouldn't be. Inverter heat pump options are designed to keep quiet day in and day out.

Optimal Airflow
Design features like a unique louver design and swept-wing blades create a higher-performing unit with more airflow and better efficiency.

EXPLORE MODEL OPTIONS

NS17H	NS18H	NS22H
		
EFFICIENT	MORE EFFICIENT	MOST EFFICIENT
QUIET		QUIETEST
Up to 16.9 SEER2 Up to 8.5 HSPF2	Up to 12.3 SEER2 Up to 8.5 HSPF2	Up to 22 SEER2 Up to 9.5 HSPF2
Single-Stage Compressor	Inverter Compressor	Inverter Speed Compressor

HEAT PUMP GLOSSARY

SEER (Seasonal Energy Efficiency Ratio): SEER measures the maximum efficiency of a cooling unit. The higher the SEER, the more efficient your cooling system will be.

HSPF: HSPF measures the heating efficiency of a unit. The higher the HSPF, the more efficient your heating system will be.

Compressor: Single-stage and variable speed inverter options offer a range of efficiency options, with variable speed models operating the most efficiently.
